

## Side looking and bottom rail retractable canal mounts for Acoustic Doppler Current Meter (ADP / ADCP)

SLM-B

### Features

Field-tested design.

Tough aluminum construction.

Modular design for custom mount length and precise instrument placing.

Solid reach-bar allows for easy instrument retrieval and precise instrument reinstalling to the exact previously set position and angle.

No diving required to load/unload instrument.

Mounts directly on the concrete lined canal or waterway sidewall.

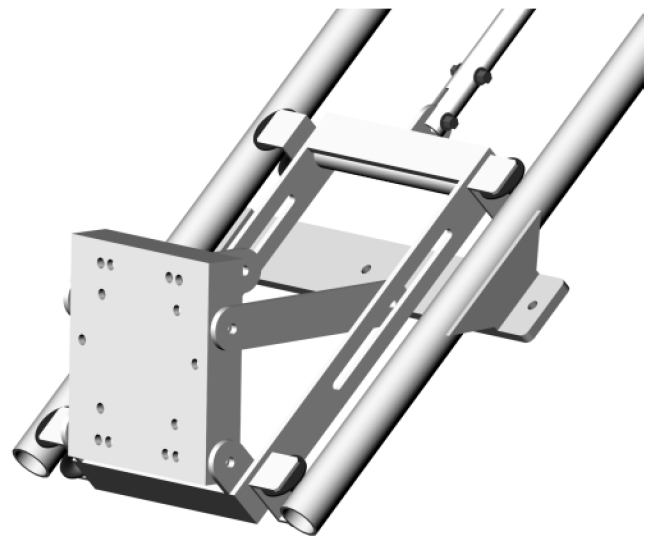

Requires a simple concrete foundation for instalation on an earthen canal wall.

### Specifications

Type 6063 and 6061 Structural Aluminum construction

316 Type Stainless Steel hardware

TIG process welding with type 5356 rod
